

Grafalloy ProLaunch 45 Wood Shaft:

ProLaunch shafts are the first shafts to be developed, designed and tested utilizing the **latest in launch monitor technology** to help golfers achieve **optimal launch conditions** for added distance.

And the Grafalloy Blue is the first ultra-light shaft **designed specifically for today's oversized drivers**. The Blue's patent-pending micro-mesh tip technology delivers **the perfect combination of tip stability and energy transfer**.

The Grafalloy ProLaunch Blue wood shaft provides the optimum launch angle while decreasing ballspin and maximizing clubhead speed. The shaft is designed to lower the overall static weight of the golf club that will create faster swing speeds for greater distance.

* Recommended Swing Speed Range (No. 1 Wood; No. 5 Iron). When ranges overlap-choose a more flexible shaft for distance - a stiffer shaft for accuracy.

@ P.T.S. Parallel Tip Section is the length of the tip end of the shaft in which the shaft walls remain parallel; important when tip trimming for custom flex options.
